

## Car Parking and the Ryde Hospital Redevelopment

To meet the future health needs of the growing community the NSW Government is providing \$479 million for the redevelopment of Ryde Hospital.

The Ryde Hospital Redevelopment will provide new and enhanced health facilities and services, including emergency, critical care, inpatient, community and ambulatory care services. It will also make best use of the current services available at the Ryde campus, including the Graythwaite Rehabilitation Centre and preserving the historic Denistone House.

Alongside the range of clinical services, additional parking will also be delivered to respond to the uplift in services the redevelopment will provide.

Following feedback received from the community and key agencies, the proposed approach to car parking has changed, to ensure it meets the needs of surrounding residents, while providing enough car parking spaces for staff and visitors.

**Under the revised proposal, which is with the Department of Planning and Environment for assessment, the following on-site car parking is being considered;**

**An on-grade (open/ground level) car park towards the back of the site on Ryedale Road as well as a separate car park at the front of the hospital accessed off Denistone Road.**

**Underground car parking under the new hospital building, accessed off Denistone Road.**

**A multi-storey car park to the side of the proposed building, accessed off Denistone Road.**

**The revised State Significant Development Application (SSDA) was submitted to the Department of Planning and Environment in mid-January 2023, with the 14 day public exhibition to follow.**

**The redevelopment team has received the feedback and is currently working on the Response to Submission.**

Alternatively, you can contact the Ryde Hospital Redevelopment team directly via the details below.
